# Wealth Accounting *and the* Valuation of Ecosystem Services

WAVES is a global partnership that aims to promote sustainable development by ensuring that the national accounts used to measure and plan for economic growth include the value of natural resources. [Learn More](#)

[Website](#) | [About Us](#) | [Natural Capital Accounting](#) | [Our Approach](#) | [Partners](#) | [Events](#) | [Publications](#)

WAVES' Team Member John Matuszak and officials from five African countries getting up close with nature while discussing NCA on a trip to the Okavango Delta, Botswana.

**Dear Colleagues,**

We are excited to announce the addition of three new [core implementing countries](#) to the WAVES partnership: Guatemala, Indonesia and Rwanda. Along with Botswana, Costa Rica, Colombia, Madagascar and the Philippines, we are now providing substantial technical support to implement Natural Capital Accounting (NCA) in eight countries.

[Guatemala](#) plans to build on their existing work on Natural Capital Accounting, [Rwanda](#) is keen to start integrating NCA into their development planning and in [Indonesia](#), we have an opportunity to learn from work done under the EcoSpace project on ecosystem accounting.

The WAVES [Policy and Technical Experts Committee](#) (PTEC) - composed of nearly 30 experts in environmental accounting, held their [second annual meeting](#) in Washington, DC. PTEC works on developing internationally-agreed guidelines for ecosystem accounting and this meeting was an opportunity to hear updates and decide on priorities for the coming year.

December 3-4, 2013

Developing an Implementation Strategy for the SEEA Central Framework in the ECOWAS and

This month saw the private sector coming together to discuss the relevance of NCA to their work. The [World Forum on Natural Capital](#) took place November 22-24 in Edinburgh, Scotland and was attended by delegates from over 30 countries - including business leaders, environmental experts and government representatives - to help identify the value of natural capital and the cost to businesses and society if that capital is depleted.

We were happy to see endorsement of NCA coming from Botswana President Ian Khama, who mentioned NCA in the November 6 State of the Nation address to Parliament, stating that Botswana is "*exploring practical measures to ensure that the true value of our own natural capital is integrated into our future national development planning.*"

Please [keep us posted](#) on work you are doing in the field and within your organizations so we can all stay on top of these combined efforts on NCA!

Thanks, the WAVES Team

## [Maps Reveal Big Picture on Land Use](#)

Ecosystem accounts show how the services provided by an entire ecosystem feed into economic activity. Preliminary results from the EcoSpace project were recently shared with the WAVES Policy and Technical Experts Committee.

## [Guatemala Joins WAVES to Advance Nature's Role in Economic Growth](#)

As a new WAVES core implementing country, Guatemala plans to build on existing work on natural capital accounting to better integrate the true value of goods and services into development policy. [En Espagnol](#)

## [NCA is a Tool that can Help Realize Africa's Ambitions](#)

Rwanda becomes a WAVES core implementing country. Rwandan Minister of Natural Resources Minister Stanislas Kamanzi spoke to the WAVES team on why he is excited about the idea of valuing natural capital.

## [Notes from the Field: Elephants Looked on as Ministers Discussed Nature's Role in Economy](#)

WAVES' Global Engagement Head, John Matuszak, writes about his trip to the Okavango Delta in Botswana with ministers and senior officials from five African countries on the sidelines of the Gaborone Summit.

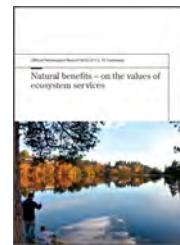

## [UK Debate a "Call to Arms" for Government to Place a Value on Natural Capital](#)

Parliament members request the "greatest possible support" from Government to embed the value of natural capital in national accounts and policy decisions.

## WAVES Voices

*"A big advantage of ecosystem accounting is that you can monitor the sustainability of natural capital and also understand how your natural capital is feeding into economic activity."*

**Lars Hein**

Associate Professor, University of Wageningen, and Leader of the EcoSpace Project

*"As Government we are thus committed to engaging both domestic and international stakeholders, in the private sector and civil society, to assist us in the conservation and sustainable development of our natural heritage.... we are thus exploring practical measures to ensure that the true value of our own natural capital is integrated into our future national development planning."*

**Ian Khama**, President of Botswana
