

Wealth Accounting *and the* Valuation of Ecosystem Services

WAVES is a global partnership that aims to promote sustainable development by ensuring that the national accounts used to measure and plan for economic growth include the value of natural resources. [Learn More](#)

Dear Colleagues,

We have had an eventful two weeks! The WAVES Third Annual Partnership Meeting, held April 8-11, was attended by over 100 people representing 18 countries and 17 international organizations. Participants included technical experts from governments, UN agencies, civil society, and think tanks as well as members of parliament and donor agencies. Together we shared on-the-ground experience implementing Natural Capital Accounting (NCA). We left the meeting highly motivated and excited to get back to our respective organizations to move this initiative forward!

On the eve of the World Bank Spring Meetings, a packed room of ministers, vice-ministers and senior policy makers from 40 countries attended our High Level Dialogue on Natural Capital Accounting. They expressed commitment to work together to scale up NCA efforts as a tool to fight poverty and climate change and promote sustainable development.

World Bank Vice President for Sustainable Development Rachel Kyte attended both events and expressed her full support to the WAVES Partnership. Make sure
