

# Wealth Accounting *and the* Valuation of Ecosystem Services

WAVES is a global partnership that aims to promote sustainable development by ensuring that the national accounts used to measure and plan for economic growth include the value of natural resources. [Learn More](#)

**Dear Colleagues,**

With our WAVES annual partnership meeting and the World Bank Spring Meetings behind us, we are quickly moving forward with our work plans in both Washington and in WAVES country offices. We are also processing requests from many new countries that have signed on to the Natural Capital Accounting (NCA) initiative. The recently-released [WAVES 2013 annual report](#) highlights our work over the past year.

In Botswana, high-level political buy-in is playing an instrumental role in moving NCA forward, starting with the construction of preliminary water accounts by the Department of Water Affairs.

Last week, the Republic of Mauritius hosted a workshop on water accounts and statistics attended by participants from five other southern African countries.

We are also pleased to announce that Switzerland has become the latest WAVES donor. Their generous commitment of \$5 million will support two complimentary initiatives within the World Bank and the IFC.

Over the summer we will be publishing our newsletter monthly instead of bi-weekly.

Thanks, the WAVES Team

## Botswana Moves Ahead on Water Accounts

High-level political buy-in for natural capital accounting in Botswana has helped the country advance on WAVES work.

## Switzerland Becomes Latest WAVES Donor

The Government of Switzerland is the latest WAVES donor, with a \$5 million contribution to the global partnership. The funds will go toward efforts to incorporate the value of natural resources in public and private sector decision-making.
